1. System Architecture & High-Level Flow

AuctionFlex360 (AF360) is an enterprise cloud auction ERP platform developed by Sandhills Global.
It connects two core stakeholders in every auction business:

1. Consignor (Seller): Brings items/inventory to be sold on commission.
2. Bidder (Buyer): Registers, bids live or online, and makes payments for won lots.

AF360 automates this entire lifecycle from intake to cataloging, live bidding, and consignor checks.

STAGE 1	STAGE 2	STAGE 3	STAGE 4	STAGE 5
Consignor Intake	**Pre-Auction**	**Auction Day**	**Settlement**	**Analytics**
Customer CRM & Lot Tag	Cataloging & HiBid Sync	Check-In & Clerking	Batch Clerk & Payout	Hammer Value Reports

2. Module 1: Customers Module (CRM & Directory)

Path: #/organization/73368/customers/customers

The Customers Module houses the universal registry for all buyers, consignors, and vendors.

* Customer List: Main CRM table. In your live account, code f778f81f-6 is Chandan Kumar (bitlyze).
* Dual Role Architecture: A customer record can simultaneously be a Consignor (seller) and a Bidder.
* Permanent Bidders: VIP recurring buyers assigned static paddle numbers (e.g. Card #5).
* Mailing Lists: Segmentation for marketing blasts based on interest (Art, Heavy Equipment, Coins).
* Action Buttons: + NEW CUSTOMER (single entry), IMPORT CUSTOMERS (bulk CSV), EXPORT CUSTOMER.

3. Module 2: Miscellaneous Module (Accounting & Admin Setup)

Path: #/organization/73368/miscellaneous/accounting

This module establishes the financial and operational settings of your auction company:

* Accounts (Chart of Accounts): Live record verified: Account #1010 | Type: ASSET | 'money in or out'. Manages double-entry bookkeeping: Cash receipts, commission revenue, and tax liabilities.
* Formulas: Sliding-scale commission calculators (e.g. 20% under $500, 15% thereafter) & Buyer's Premium.
* Payment Processor: Merchant gateway configuration (Global Payments) for credit card self-checkout.
* User List: Staff credentials with role-based permissions (Super Admin, Clerk, Cashier, Cataloger).
* Company Details: Legal name, physical auction house address, auctioneer state licenses, and tax IDs.

4. Module 3: Auctions Module & Complete 3-Stage Lifecycle

Path: #/organization/73368/auctions - Live Auctions: 'fgf' & 'XCXZC' [10/21/2026 - 10/30/2026]

STAGE 1: PRE-AUCTION (Setup, Cataloging & HiBid Sync)

Details Sub-tab: Event title, dates, Tax Exempt All toggle, featured banners, auction terms and links.
Upload Settings: Starting Card 7000 (prevents collision with floor card 1-500), Soft Close timer, Credit card hold.

* Lots Sub-tab: Inventory cataloging. Har item ko Lot #, Title, Description, Consignor Code aur Reserve Price ke sath tag kiya jata hai. Unsold items reserve price ke neeche nahi bikte.
* Action Buttons: + NEW LOT (manual), IMPORT LOTS (bulk CSV/Excel), IMPORT LOTS BY BARCODE, SCAN LOT (warehouse handheld scanner), SALE ORDER (re-order lot sequence).
* Lot Images: Drag-and-drop multi-photo batch uploader with automated cloud thumbnails.

STAGE 2: AUCTION DAY (Operations & Live Clerking)

Dashboard Sub-tab: Live metrics - Lot Count, Registered Check-In Bidders, Unique Sellers, Hammer Total.
Check-In Sub-tab: Front-desk registers buyers, scans IDs, and issues physical bidding paddles.

* Clerking Sub-tab (Core Engine): Clerk records winning bids in real time as auctioneer sells.
  - Pre-Cataloged Mode: Item is already on screen. Clerk types Hammer Price (e.g. $450) and Bidder Card # (e.g. 102) and presses Enter. Advances to next lot in under 3 seconds.
  - On-The-Fly Mode: For uncataloged estate/storage sales. Clerk types item description live.
* Alternate Bids Sub-tab: Auto-notifies clerk when floor bids challenge absentee/phone bids.

STAGE 3: SETTLEMENT (Closing, Invoicing & Payouts)

Batch Clerk Action: Bidding close hone ke baad admin Batch Clerk chalata hai jo sabhi winning lots group karta hai.
Settlement vs. Invoice: Settlement internal tax audit sheet hai; Invoice external online payment bill hai.

* BATCH SHIPMENTS: Calculates shipping weight and courier freight for winning bidders.
* UPDATE INVOICES: Refreshes total payable balance with packing, freight, and sales tax.
* PRINT / EMAIL: Batch dispatches payment link via SMS/Email to winning buyers for online checkout.
* Seller Settlement: Consignor ka commission (e.g. 15%) aur fees kaat kar net payout check release karta hai.

5. Module 4: Reports & Analytics Portal (portal.auctionflex360.com)

The Reporting Portal provides visual intelligence, exports, and executive company configuration:

* Hammer Value Widget: Displays Gross Merchandise Value (GMV) across completed auctions.
* Auctions Held: Total event counter (Currently 2 in bitlyze account: 'fgf' and 'XCXZC').
* Lots by Clerking Status: Real-time pie chart of Sold, Unsold/Passed, and Pending lots.
* Reports Library: Certified accounting reports, consignor statements, sales tax audits, IRS 1099s.
* Settings (/settings): Custom Company Logo Uploader (Max 500KB) watermarked on all invoices & paddles.

6. Real-World End-to-End Walkthrough (Step-by-Step Scenario)

Example: How an item travels from seller intake to customer payment and consignor payout

STEP	ROLE	MODULE / SCREEN	ACTION & SYSTEM EXECUTION
Step 1	Staff	**Customers Module**	Consignor 'Rahul' registered. Unique Consignor Code #C-104 assigned. *Profile stores seller payout bank details and tax ID.*
Step 2	Cataloger	**Auctions > Lots**	Lot #1 'Vintage Rolex Watch' created. Linked to Consignor #C-104. *Reserve $1,500 set; 4 photos uploaded in Lot Images.*
Step 3	Admin	**Auctions > Upload Settings**	Internet Only selected. Starting card 7000 set. Uploaded to HiBid. *Auction goes live for global internet pre-bidding.*
Step 4	Clerk	**Auctions > Clerking**	Online Bidder #7045 wins lot at $2,000. Clerk records Hammer Price. *Presses Enter; lot is marked Sold and closed.*
Step 5	Cashier	**Auctions > Settlement**	Admin runs Batch Clerk. System adds 10% BP ($200) + tax ($176). *Total $2,376 invoice dispatched to Bidder #7045 for online credit card payment.*
Step 6	Accountant	**Auctions > Seller Settlement**	Seller settlement generated. 15% commission ($300) deducted from $2,000 *Net $1,700 payout check printed and released to Consignor Rahul.*
Step 7	Owner	**Portal Dashboard**	Gross Hammer Value increases by $2,000; Net House Profit: $500. *Commissions ($300) + Buyer's Premium ($200) logged in Asset #1010.*

Hinglish Summary & Operational Takeaways (Aapke Liye Zaroori Baatein):

1. System ek unified ERP hai jahan Consignor (maal bechne wala) aur Bidder (khareedne wala) dono Customers module me maintain hote hain.
2. Auction Day me live clerking sirf Hammer Price aur Paddle Card number daal kar Enter dabane se chalti hai.
3. Settlement ke waqt Batch Clerk chalta hai jisse sabhi jeete hue items group hokar Invoices ban jate hain aur direct online credit card payment link SMS/Email chala jata hai.
4. Seller Settlement me consignor ka 15% commission automatic cut hokar unka net bank check print hota hai.
5. Reporting Portal (portal.auctionflex360.com) me Hammer Value aur tax audit documents live update hote hain.

Aapka Account Ready Hai: bitlyze (Org ID: 73368)

User: Chandan Kumar (chandankumar@gmail.com) | 2 Active Test Auctions ('fgf' aur 'XCXZC') already bane hue hain.
Chart of Accounts me Asset Account #1010 ready hai. Aap live items catalog karke live test run kar sakte hain.
